DETAILED ACTION

Claims 1-16 are pending in this application. Claims 1-9 (in part) and claims 10-15 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

Response to Restriction

Applicants' election of Group I, claims 1-9 and 16 (all claims in part) drawn to the

compounds represented by formula (I), , and specific compound of Example 1,

, in response filed 19 December 2005 is acknowledged. The election was made without traverse.

In accordance with M.P.E.P. 821.04 and *In re Ochiai*, 71 F.3d 1565, 37 USPQ 1127 (Fed. Cir. 1995), rejoinder of product claims and method of use claims commensurate in scope with the allowed product claims will occur following a finding that the product claims are allowable. Until such time, a restriction between product claims and process is deemed proper.

Art Unit: 1626

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Scope of the elected subject matter:

:

Compounds of formula I, depicted in claim 1, wherein:

R¹ represents an optionally substituted five or six membered heterocyclic ring; **R⁴** represents an optionally substituted phenyl or naphthyl group; **R² and R³** are as defined except that they do not represent a heterocyclic group.

As a result of the election and the corresponding scope of the invention identified supra, the remaining subject matter of claims 1-9 and 16 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn compounds contain varying functional groups such as triazine, thiomorpholinyl, propylaminyl etc, which are chemically recognized to differ in structure and function. This recognized chemical diversity of the functional groups can be seen by the various classification of these functional groups in the U.S. classification system, i.e. class 544 subclass 63(+) (thiomorpholine), class 540 subclass 450(+) (homopiperziny), class 544 subclass 180(+) (triazines), 548 subclass 400(+) pyrrolidines etc. Therefore the subject matter which are

Art Unit: 1626

withdrawn from consideration as being non-elected subject differ materially in structure and composition and have been restricted properly a reference which anticipated but the elected subject matter would not even render obvious the withdrawn subject matter and the fields of search are not co-extensive.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 16 is an independent claim and there is no definition for the different variables **R¹ - R⁴** that are part of the Formula III or IV or X. Therefore the claim is indefinite because it is not clear whether these variables have the same definitions as the one recited in claim 1. It is suggested that applicants amend claim 16 by making the it dependent on claim 1 or recite the definitions of each variable mentioned in the claim.

Objections

Claims 1-9 are objected to for containing non-elected subject matter. Claims drawn solely to the elected invention as identified supra, would appear allowable.
